Sažetak: Cilj rada je prikaz stavova prema osobama sa invaliditetom budućih radnih terapeuta. Studenti prve godine studijskog programa strukovni radni terapeut odseka Visoka zdravstvena škola, Akademije strukovnih studija Beograd (AASB), ispitivani su korišćenjem dva upitnika: Toronto Empathy Questionnaire (TEQ) (Spreng, 2009) i Attitudes Towards Disabled Persons Scale (ATDP) form 0 (Yuker, Block and Young, 1970). Istraživanje je sprovedeno u letnjem semestru školske 2022/23. godine uz odobrenje Komisije za etički odbor ASSB. Pretpostavka je da će studenti koji su se opredelili za zdravstvenu profesiju pokazati i na početku školovanja visok stepen empatije za osobe sa različitim oblicima invaliditeta.

Ključne reči: stavovi, studenti, osobe sa invaliditetom

ATTITUDES OF STUDENTS IN THE FIRST YEAR OF STUDY FOR THE PROFESSIONAL OCCUPATIONAL THERAPIST ABOUT PEOPLE WITH DISABILITIES

Abstract: Aim of this paper is to present the attitudes of future occupational therapists towards persons with disabilities. First-year students at Academy of Applied Studies in Belgrade (AASB), Department High Health College, study group Professional Occupational Therapists were examined using four questionnaires: Toronto Empathy Questionnaire (TEQ) (Spreng, 2009), and Attitudes Towards Disabled Persons Scale (ATDP) form B (Yuker, Block and Young, 1970). The research was conducted in the summer semester 2022/23. with the approval of the ASSB Ethics Committee. The assumption is that students who have opted for a health profession will show a high degree of empathy for people with different forms of disability even at the beginning of their education.

Keywords: attitudes, students, persons with disabilities
